

SALT RIVER HERALD.

SATURDAY, MARCH 20.

TELEGRAPH TO CAMP McDOWELL.

There is enough wire and insulators now lying at the Phenix telegraph office to build a line from here to Camp McDowell. This work, so much needed in the transmission of orders from headquarters and to expedite any necessary movement of troops, should be done at once. It will, since the necessary supplies are on hand, virtually cost the Government nothing. The poles necessary can easily be procured from the Gila Valley, and the line be put up, all by soldier labor, and by the time it is completed a soldier at Camp McDowell can be prepared to act as operator at that end of the line. It would prove a great blessing to the officers and the Post and save its price in horse flesh, now used up in carrying dispatches every year.

In our last issue we stated that the Chico claim and E. M. Hutchings' northeast extension of the Golden Star mine was included in the sale of that mine. Such was the supposition upon Mr. Helling's departure from Phenix, but as no sale took place, only an incorporation, the two claims above mentioned were excluded.

Plant fruit, shade and ornamental trees; plant any and every kind of trees. They pay better than anything else you can plant. A twig of cottonwood this spring will produce a cord of fire wood in three years. Plant trees on waste places about the house, whenever they will grow it will pay.

The Mining and Scientific Press of San Francisco, under date of March 16, copies a long description of the different workings of the Tip Top Mining Company, that was written for and appeared in the HERALD February 23, and gives credit to the Prescott Miner of March 1.

The Miami quartz mill is assessed for \$25,000 in Maricopa county. A map of the Globe District, compiled from Government surveys by Chas. Drayton Gibbs, to January last, locate this mill about 1700 feet north of the southern boundary line of Maricopa county.

Don't you think the Board of Supervisors had better attend to the repairing of streets and crossings somewhat? The late rain has left them in such a condition as to make it very disagreeable for pedestrians as well as to those driving vehicles.

All Eastern and California mail to and from Phenix is obliged to lay over at Wickenburg thirty three hours. We call attention of Capt. Blaisdell, U. S. Postal Agent, now at Prescott, to this fact.

It would be doing a great injustice to the great Salt River Valley if Capt. Blaisdell, United States Postal Agent, should return to California without visiting Phenix.

The bill to increase the representation in the Council and the House of this Territory has passed the House, at Washington, and is expected will pass the Senate.

The first four miles of the Tip-top road from Phenix is in a deplorable condition, and should receive attention from the Board of Supervisors on Monday next.

Irvine received a large lot of lumber this week by the trains of Bryan and Miller.

PHENIX.

The prosperity of a growing community is best judged by the enterprise and success of its business men. Phenix is making rapid strides toward a thriving business center, and its close contiguity to the richest mining districts now developed in the Territory, and the near approach of the railroad, point to it as the most available place as a base of supplies. Merchants from other parts of the Territory are looking this way with a view to investment, while our established merchants are laying in, or have laid in, large stocks of goods to meet the growing demand for all kinds of merchandise. The new Territorial road from Yuma to Phenix is but 180 miles, with light grades and little or no sand, crossing the Gila river at Burks station. It is but just completed and there has been but little travel over it as yet, though in a short time it will be the favored route, as there is an abundance of water at convenient distances all along the road, thus placing Phenix in closer communication with California for freighting than any other business place in the Territory furnishing the mining camps of Central Arizona with supplies. A good road from the Peck and Bradshaw districts will secure the trade to Phenix of those thriving camps, while it is the natural source of supply for Humboldt district and the fast growing district of Cave Creek. We look to a near and brilliant future for Phenix.

SONORA RAILROAD.

Plans and surveys for this road have been approved by the Mexican government. The shortest line between Guaymas and Hermosillo is eighty miles; the route adopted is 100 miles. From Hermosillo to the Arizona border is 197 miles total from Guaymas 297. The route taps the fertile and well watered valleys of San Marcial, San Miguel, Magdalena and of the Sonora river. The latter valley alone supports thirty-five flouring mills, and ships seven thousand tons of flour annually to Guaymas for southern ports of Mexico. Mr. Schuyler estimates cost of construction and equipment at \$10,500 per mile. The trade of Southeastern Arizona alone would afford a paying business, independently of the mining and agricultural interests of Sonora. The harbor of Guaymas is a perfect one, and deep water is easily reached by short wharves. The Mexican government has made valuable concessions and given franchises which in themselves would afford a profit on building the road.

Booth, First Infantry, now at the office of the Chief Signal Officer of the Army, will proceed to San Diego, Cal., and relieve Second-Lieut. Philip Reade, Third Infantry, of his duties. Lieut. Reade, upon being relieved, will report in person to the Chief Signal Officer of the Army at Washington.

ABOUT RAILROADS.—The Atchison Topeka & Santa Fe Railroad, has filed articles of incorporation in the Secretary's office at Santa Fe and put five hundred men at work on its road which it proposes to push on to Cimarron as rapidly as possible.—[Messilla Independent.]

Court meets next week. Calendar will be found in this issue of the HERALD.
